Notes

Where an IMO bears a suffix of *, this indicates that the final digit has been calculated and is not from an official source.

Where a GT bears a suffix of *, this indicates a displacement tonnage.

Where an entry is in *italics* then this indicates that we have not been able to confirm entries in Lloyd's Registers or they are naval or ancillary vessels. *Italics* are also used for subsequent sightings of a vessel during the trip at either a different location, or on a different date.

Codes as similar to those that were as used in the late lamented Lloyd's Shipping Index published by Lloyd's MIU up to 2012 and are acknowledged as such.

The content has been researched from authoritative sources (principally Lloyd's Register's of Ships - published by the Lloyd's-Fairplay Group; and various web sites including Equasis). Again full acknowledgement is made. Other members of the World Ship Society and Solent Maritime have contributed information for which the compilers are grateful and acknowledge - especially David Walker and Krispen Atkinson. Thanks are also due to Andrew Hogg of WSS Southampton who arranged this trip and to Neil Richardson for providing the AIS data used in the compilation of this list.

Some lists produced may only cover ships seen on a particular date, but the date column is retained on such lists for uniformity.

Please note this list is produced for non-commercial use of shipping enthusiasts only. No responsibility is accepted for any errors or omissions or their consequences. Apologies are offered to the authors/publishers of any sources used for reference purposes but not specifically acknowledged above.

This list is not exhaustive and only contains details of ships sighted by the compilers.
